<ul style="list-style-type: none"> • He is amazing, I would recommend him as a teacher of this course to anyone. He is beyond understanding and helpful and allows me to receive as much credit as possible while also making sure I understand what is going on. • This professor was amazing, and I actually learned a lot of math. His style of teaching was engaging, and made me feel motivated to engage in the class as well as approach the concept of the homework as a learning opportunity rather than a chore, which is how math has previously felt to me in the past. I really appreciate this professor's care for his students, as well as mindfulness on how we have other classes. His teaching is very guided by the course objectives and everything he taught us was necessary for us to excel in the course. • He was very accommodating to students and did an excellent job creating a good educational environment for them. he was understanding and very helpful with not only teaching the material but also teaching it outside of the classroom as well, giving students many opportunities to see him after class and during office hours. • One of the best teacher's I've had at SU; really valued the students' time and prepared us for exams. • Jia was an extremely effective and helpful professor, leading engaging classes and review sessions. • He is a very nice and good instructor, which helped me greatly in math. I had a question about my homework, and I sent the email, and he quickly responded and gave me suggestions. • Very good Professor, made everything really easy to understand • Best math teacher I have ever had. He actually taught me calculus and didn't make me hate coming to class. He is funny and nice and understanding. • I loved the review sessions and note taking formats. It was very easy to digest and helped my learning a lot as someone who has never taken calculus before! • Jia was a really motivating, flexible, and adaptive teacher during this semester. Very effective in explaining concepts and communicating with students, especially for challenging units. Great teacher overall and I highly recommend his section to other students, especially those who need extra support in Calculus • Overall the class went very well. I had some pre-calculus experience from high school so in the beginning material was very straight forward, but even as topics became more difficult I was able to learn from the teacher and succeed in the class. • Love this class! Excellent teacher and has great reviews! • This class was very well organized. The TA was extremely helpful and explained topics clearly. • The best teacher I have ever had. I have never gotten the grades on a test like I have in this class and it is all thanks to Jia.
