15 - Please leave any additional comments.

Response Rate 14/26 (53.85%)

- Give Professor Jia a raise!!! He was literally the best!
- Professor Jia was an incredible professor who cared about his students success and wanted to make sure that we were learning. He also has a good dress sense.
- I really like how Professor Jia teach the math, it is interesting and easy to understand. Students can also get-well feedback from each examination and quizzes.
- I appreciate the time taken by Professor Jia to review the study guide before the exams in-class and reviewing past final exams before our upcoming final for the course.
- The process of clearly working through problems in front of the class was an effective teaching strategy for me. Great performance!
- The course is super good and Jia is a excellent instructor who always explain the questions very clear and understandable
- Instructor Jia was very helpful in delivering homework tips in a swift manner that allowed me to study Maths (something I've always been bad at) in a clear, concise way. Furthermore, instructor Jia has been reasonably lenient with granting extensions, relieving my stress in multiple occasions throughout the semester.
- I wish the class could slow down a little bit, but overall the professor is pretty good.
- I like this class and my professor is extremely helpful. I understand that webwork is widely used, however it is very frustrating to use. I have spent several hours on the homework, when there was only a small issue with my result. I wish there was a way to pinpoint what we were doing wrong so we could correct ourselves, because it isn't always easy to figure out. I do appreciate how available my professor was when I emailed him questions through webwork, but felt bad because I was constantly nagging him with my questions.
- My professor (Jia) did a really good job explaining the content thoroughly and making sure we didn't have remaining questions after the lectures. The in-class problems and practice exams were big contributors to my success in this class. He clearly wanted us to do well in this course and was always willing to help.
- I've really appreciated the flexibility of instructor Jia. Love that student input is taken into consideration with regards to decisions about quizzes and tests. Instructor Jia has also been very helpful, replying to my webwork questions super quickly.
- Professor Jia is doing a great job with this course. I was blown away by the well-organization and clarity.
- This course is interesting and challenging. I am really enjoying the class and I feel like everything makes a lot more sense than it did when I first learned some of these topics.
- Instructor was very knowledgeable and good at explaining things.
