Response Rate	15/23 (65.22%)
<ul style="list-style-type: none"> <li>Jia's lectures were very well organized and allowed me to learn the material easily.</li> <li>None, this class was amazing.</li> <li>I enjoyed the class, thank you!</li> <li>This course was great. After the first exam, when the class asked for more time on the exam, Jia allowed us more time and it made a world of difference. Jia was very accommodating and wanted us to do good in this course! I really enjoyed the course and felt as though I truly learned the material!!! Thank you Jia !</li> <li>Best teacher I've had here. Good at explaining materials. He is an understanding teacher who is willing to work with you to make sure you understand and always willing to help. One of my favorite classes because of him.</li> <li>I usually don't like taking math, but this class much better than I expected. I was able to pay attention to the lectures and actually understood all the concepts. Great teaching method.</li> <li>N/A</li> <li>The webwork questions were definitely harder which is a positive and negative thing. The positive it really challenged me to apply the basic concept I learned to difficult questions and expand on the knowledge, the negative being I was somewhat extremely confused as to what to do after a certain step. I would suggest doing just one webwork question in class just to clarify what is to come for homework. Overall the class was good professor Jia really challenged us as well as accomadated to our living situation during the COVID-19 crisis. Another thing would be offering breaks about 10 minutes/5 minutes in class (which was done but later on in the course) just because I found it very hard to focus after a very difficult lecture such as math.</li> <li>This was a great course and I appreciated the personal feedback on my work. I saw huge improvement in my calc skills from the beginning of the semester because of this class</li> <li>I took Calculus 1 last semester and had a very difficult time focussing and learning material. This semester in Calculus 2 with Professor Jia, I have felt very confident in my ability to solve problems and learn the information. He does a very good job of explaining topics and the steps in which you need to follow to solve them. I have not had any trouble this semester because of his style of teaching as well as his ability to match what we learn in class with exams. My grade this semester has been substantially better and it is due to the teaching method of Professor Jia. Thank you for helping me understand the material and allowing me to succeed in this class !</li> <li>My professor did a great job emphasizing important course material and prepared us really well for each test and quiz!</li> <li>Excellent job</li> <li>Mr. Jia is a really good teacher. He can actually teach. As a person who tutors SAT math, it's obvious that he puts a lot of thought into making his lesson plan and simplifying all the concepts. We obviously didn't have a lot of time to do examples which was hard for the people who don't have the best math skills. Maybe in the future, he could make it a worksheet with some extra problems and have the worksheet count towards classwork or participation. But long story short, Mr. Jia is definitely a qualified teacher/to-be professor.</li> <li>Professor Jia's lectures are very clear and he makes stuff that are not easy to easy. He is really helpful in and out of class and cares about how you are doing. Lots of quizzes but they mirror the class problems. Overall awesome class and great professor.</li> <li>The lecture recording and notes were extremely helpful.</li> </ul>
