15 - Please leave any additional comments.

Response Rate 13/25 (52%)

- The course instructor always made sure to go the extra mile, giving experience from prior years, advice, time, and individual help in class if ever there was an opportunity without making the class come to a halt. Not only that but during the lectures he was able to adequately read the room and allow for brief rests which allowed the class to focus better when normally their understanding would come to a standstill. I am confident that any student with this instructor would have a grade fitting the effort they put in.
- I appreciated the way everything was taught, and especially the way we reviewed everything in a clear manner which made studying for exams and quizzes way easier for me
- I think the instructor did an especially good job of leading review before our exams to allow us to do well on the exam. Furthermore, the use of quizzes was helpful for us to find out what we still needed to work on before the exam and to contribute to our grade.
- The instructor was always very kind and helpful. He was willing to do everything in his power to help me understand the material.
- I really like this class. My only suggestion would be moving slower while going over problems. Overall professor Jia is great.
- Professor Jia lead a good class and made every second of a lecture count with information that actually helps the students on the exams and quizzes.
- Professor Jia gave every student a fair opportunity to succeed. He did a great job of explaining course material thoroughly and properly prepared his students for exams and quizzes. Overall was a great professor!
- He is a really good teacher, he wants all his student doing good on the course and he is willing to spent time with us. All his lectures and class material are helpful.
- Jia is a great instructor & I think its truly because of him I was able to perform really well in this course. He explained everything I needed to know in the easiest way possible & got straight to the point. He always asked us if we had any questions to make sure we were understanding. He is also very reasonable & understandable if a student needed an extension or something. He really wants his students to exceed & do well. Id recommend him to anyone.
- I really enjoyed taking this class. This semester was difficult for me, and I really appreciate how you were there to help me if I needed it and always available for me to reach out to. I also like the way that you lecture and approach the material
- Jia does a great job of explaining to the class every unit that we have learned and I can tell he really wants all of the members of his class to succeed. I understand stats much better this semester than I did last semester and it definitely shows through my grades. He makes sure the entire class is fully prepared before exams and gives us really helpful tools to study which in turn helps the entire class perform to their maximum potential on every exam. His notes in general are also very logical and easy to understand and I can tell that he organizes and plans out his lectures ahead of time which makes for a really smooth lecture that is easy to follow.
- Overall, stats last semester was not a class that i performed well in because i didnt really understand it. this semester i found that the way the class was structured and the way he taught was extremely helpful and i really enjoyed learning at the same time. he was always available and made all the topics very clear
- Jia was available at all times if I had any questions or needed verifications. Very helpful and effective instructor i've had
