- Class was great for being in the summer! I'm able to balance it with my internship and have enough time to really learn everything.
- This class has outlived it's useful life. I highly doubt I will ever be asked to figure out the profit maximizing price by hand using the demand function and total cost function. These things are all done by computer programs now. This class needs to be ditched.
- great instructor
- Giving the option to attend class asynchronously helped me plan out my schedule better (more customizable). But class time and deadlines synchronously were great as well.
- Professor Jia was amazing and taught everything clearly. He encouraged us to ask questions if we needed any help and gave a great intro to calculus.
