#### **Written Comments**

- Jason is the best Math TA that I could ask for. He is always patient and answers all my questions professionally. I can see that he is very serious and enthusiastic about math. Definitely knowledgeable on any MAT 122 topics. He has been a great help for us on both labs and lectures. Makes everything clearer. Appreciates him to be my TA this semester. Even after we switched to online lessons, he keeps on helping us through email and sends reminders for quiz completions. Thank you Jason!
- The labs during class were typically manageable and the help I received was always beneficial, however the online quizzes have been somewhat difficult because it is harder to learn online during lecture.
- the online change was difficult
